

Karunya Kalkhundiya

AI / Machine Learning Developer Intern Candidate

karunya.kalk@gmail.com | +91 7013170637 | [Linkedin](#) | [Github](#) | [Portfolio](#)

Summary

Final-year B.Tech CSE (AI/ML) student who builds and ships machine learning and GenAI systems end-to-end – from data preprocessing and model training (PyTorch, TensorFlow, Scikit-learn, Pandas, NumPy, Matplotlib) through CNN/RNN/LSTM-based deep learning to RAG pipelines, semantic search, and production deployment. Backed by hands-on full-stack engineering experience (React.js, Node.js, MongoDB, REST APIs) from a live internship, plus exposure to cloud platforms (AWS/GCP) for model deployment. Comfortable taking ambiguous ML problems from experimentation to production.

Technical Skills

ML / Deep Learning:	PyTorch, TensorFlow, Scikit-learn, CNNs, RNNs, LSTMs, Predictive Analytics, Model Training & Fine-Tuning
Data Analysis & Visualization:	Pandas, NumPy, Matplotlib, Power BI, Data Preprocessing
GenAI / NLP:	Generative AI, NLP, RAG Pipelines, Semantic Search, Prompt Engineering, ChromaDB
Languages:	Python, Java, C++, JavaScript, SQL, Data Structures & Algorithms
Backend & APIs:	FastAPI, REST APIs, React.js, Node.js, MongoDB
Cloud & Tools:	AWS, GCP (exposure), Git, OpenAI API, Gemini API, Agile

Key Projects

DevOps Change Intelligence & Risk Analysis Platform

In Progress

Python, FastAPI, React.js, SQL, OpenAI/Gemini APIs, ChromaDB, Power BI

- Built a working MVP that lets a technical team upload deployment documentation and uses LLMs to translate between technical and non-technical language for cross-team communication – a real production-style AI system, not a notebook experiment.
- Actively developing an AI-assisted risk-analysis layer (LLM-driven log analysis, risk-percentage scoring, suggested alternatives) alongside a RAG-based semantic search over historical incidents using ChromaDB.

Personal Finance Tracking & Insights Dashboard

Completed

React.js, Power BI, Python, Pandas, NumPy, Matplotlib, Predictive Analytics

- Built a personal finance dashboard, now used by the author and 5–6 classmates, with the data model designed to extend to multi-user support.
- Prototyped spending-pattern and anomaly-detection logic in Python (Pandas/NumPy/Matplotlib) that surfaced real spending patterns and concentration areas; users reported it more useful than other finance apps they had tried.

Professional Experience

Full Stack Engineer Intern – Incise Technology

May 2025 – Jul 2025

React.js, Node.js, REST APIs, MongoDB

- Built backend modules and frontend integrations for an enterprise project-management platform on the React.js, Node.js, and MongoDB stack.
- Reproduced a deployment-pipeline crash affecting roughly 1 in every 4–6 releases against a 7–8 release/week cadence, contributing to a fix that kept deployments stable through the following sprint – hands-on debugging of a live production system.
- Designed REST APIs for workflow automation and cross-service communication, giving the engineering team clearer visibility into project ownership and stage across the platform's core modules.
- Worked within cross-functional Agile squads, participating in sprint planning and iterative feature delivery.

Certifications

- SAP Certified – Generative AI Developer, SAP
- Oracle Certified Professional – Java SE 17 Developer, Oracle

Education

B.Tech in Computer Science & Engineering (AI/ML Specialization)

Aug 2023 – Expected 2027

SRM University – Andhra Pradesh, India

CGPA: 7.7 / 10.0

Leadership & Achievements

- **Co-Lead, Google Developers Group (GDG-SRMAP)** – Led technical workshops and developer education for the university community; personally hosted the AI workshop, and the chapter’s mini-hackathon grew its reputation under this leadership.
- **Vice Chair, Model United Nations (2x)** – Led committee proceedings and facilitated decision-making across two conferences.
- **Co-Convenor, Gender Championship (SRMAP)** – Conducted 3–4 workshops and activities on gender sensitivity and empathy education for the student community.
- **Sports** – School Team Captain, Throwball; State-Level Bronze Medalist, Taekwondo.
